VISION

Providing bespoke CCTV across multiple industries ensuring you get the best from your CCTV system.

- Increased safety and security
- 24/7 surveillance
- Crime deterrent with visible cameras

RAPID DEPLOYMENT

02

RAPID CCTV

DNS Solutions specialise in temp monitored CCTV. We use the latest technology in AI detection ensuring false alarms are kept to a minimum. Any unauthorized trespassers can be moved on efficiently to minimise potential accidents and thieves can be deterred and dealt with proficiently.

03

ACCESS CONTROL

BESPOKE FRONTLINE SOLUTIONS

Our Access control systems are designed specifically for each client, whether you require finger print, retina scan, card /fob or pin code access to buildings, offices apartments or your home. We have a solution for you.

INTERCOM

04

Security intercom systems are used to provide voice communications between two or more locations for security purposes. Security intercom systems are frequently used between a locked building entrance door and a constantly attended location in the building, such as a manned security control room.

FIRE ALARMS

05

COMMERCIAL & DOMESTIC SYSTEMS

Fire Alarm Systems are designed to provide early notification of a fire to help reduce the risk to both the building and the people within it. Therefore, at DNS SOLUTIONS LTD, we understand the importance of maintaining your fire alarm system to ensure it operates effectively in the event of a fire emergency. We carry out risk assessments. Design, maintain & install your system.

NURSE CALL

06

OUR LATEST SERVICE

In summary, nurse call systems offer numerous benefits, including improved patient safety, efficient communication, rapid response times, increased staff efficiency, higher patient satisfaction, data-driven insights, and integration with other healthcare systems. These advantages collectively contribute to better healthcare outcomes and enhanced overall patient experience.
